## Independent Systems – Celebrating 21 Years

Independent Systems, responsible for the development, maintenance and support of **Accpick Xcellence**, is celebrating its 21<sup>st</sup> birthday.

Founded in 1988 by Angelos and Helen Christodoulou, Independent Systems grew from a demand for the services of qualified and experienced computer and retail consultants with programming skills and accounting backgrounds.

In 1991 **Accpick** was born of a need to address the impending switch from GST to VAT resulting in SME's having to take charge of their Point-of-Sale and accounting functions.

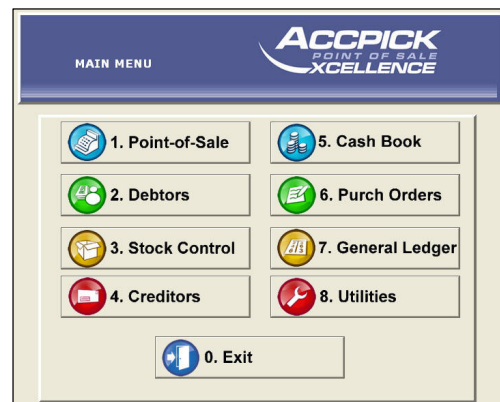

Today the Independent Systems Team of Developers, Technicians, Support Consultants and Sales Personnel, assist in developing efficient Point-of-Sale solutions for various retail and wholesale outlets across a range of industries in Southern Africa.

To a large degree, it is the **Accpick** users who have driven the development of the program by identifying criteria which are vital to the management and control of successful business operations. Ease of use, stability, reliability, system controls and sound accounting practices for debtor, creditor, inventory and cashflow control as well as sales and marketing management are constantly being addressed by our team.

To the long list of satisfied clients Independent Systems has served, a big birthday "thank you" for your loyalty and input over the last 21 years.

Assuring you of our continued support.

The Independent Systems Team

Members: **E. Christodoulou** B. Com (B.D.P.) **H. Christodoulou** B. Com (H.E.D.)
